Re: Storm Water Management Facilities Inspection

Dear Township Trustees:

The Summit County Engineer has hired the engineering consulting firm of CT Consultants to assist us with performing condition inspection of the Storm Water Management Facilities (SWMFs) within the Assessed Subdivisions in townships in District 2 (south of State Route 18).

These SWMFs are located outside the roadways, within easements beside and behind homes in the subdivisions. Accordingly, it will be necessary for CT Consultants inspectors to enter the portion of the homes' properties covered by easements in order to observe the current field conditions of these SWMFs.

CT Consultants inspectors will carry full personal identification and a copy of this letter. The work in your township is scheduled to take place between August 31, 2020 and October 31, 2020.

If you have project concerns or would like additional information on the details of this project, please contact me at 330-643-8537.

Respectfully,

David Koontz
